Cancer Precursors Epidemiology Detection And

The book's title is Cancer Precursors: Epidemiology, Detection, and Prevention. Epidemiologic methods are useful for investigating the natural history of disease, or the progression of the disease process over time, from exposure to or accumulation of factors that lead to pathologic change, to onset of symptoms, to an eventual outcome (recovery, disability, remission, or death).

We will discuss monoclonal B-cell lymphocytosis (MBL) as a precursor to chronic lymphocytic leukemia (CLL) and monoclonal gammopathy of undetermined significance (MGUS) as a precursor to multiple myeloma and Waldenström macroglobulinemia. Lymphoid malignancies show significant familial aggregation (1-5).

Cancer precursors : epidemiology, detection, and ...

Women with abnormal results on cervical cancer screening, which is usually done via scraping cells from the surface of the cervix, are referred for colposcopy and biopsy to detect cervical cancer precursors (typically classified as high-grade squamous intraepithelial lesions, or HSIL).

Multiple biopsies are superior to a single biopsy in ...

Colorectal cancer (CRC) screening has been widely implemented in Europe and the USA. However, there is little evidence of participation and diagnostic yields in population-based CRC screening in China. The participation rate and detection of colorectal lesions in this program were reported and related factors were explored. The analysis was conducted in the context of the Cancer Screening ...
