DR. MAX TRUMPER, 79, BIOCHEMIST, AUTHOR - The New York Times

Deborah C. Rice. Lead has been recognized as a poison from ancient times to the present (Cantarow and Trumper, 1944; Oliver, 1914). Over the last decade or so, attention has focused on the subtle effects of environmental exposure at levels presently considered "normal" in our industrialized age [Landsdown and Yule, 1986; Mahaffey, 1985; National Academy of Sciences (NAS), 1980; Needleman, 1980 ...

Clinical biochemistry (Book, 1939) [WorldCat.org]

PD-L1 and PD-1 (PD) pathway blockade is a highly promising therapy and has elicited durable anti-tumor responses and long-term remissions in a subset of patients with a broad spectrum of cancers. How to improve, widen, and predict the clinical response to anti-PD therapy is a central theme in the field of cancer immunology and immunotherapy.

Elevated values for serum alkaline phosphatase activity are found in cases of abnormal bone metabolism and in hepatic and biliary tract diseases. The proper interpretation of alkaline phosphatase values should include other data relating to calcium and phosphorous metabolism. Hoffman (26) and Cantarow and Trumper (27) have reviewed these subjects.
