## Where To Download Commodore Vz Engine Relay

Shitty V6 VZ won't start. It was parked on a steep hill, it started then went a few meters then died and refuses to start again. Low fuel, service vehicle soon and traction control errors (strange because it doesn't have it) keep popping up. Tried a new battery, checked fuses added 10L of fuel because it was low before. Same thing.

Pin 87 will be the relay output and 30 should be the constant power source. 85 and 86 should be the terminals for the relay coil. One will be grounded in park and neutral and the other will have power with the key in the crank position. You'll want to see which one if these is missing when it won't start.
