Isabella Wine Grapes

The skin of Isabella when ripened is a dark purple, almost black with a tender green-yellow flesh. It has large well formed fruit clusters with thick bloom. It is a slip skin variety, meaning that the skin separates easily from the fruit. The grapes are used to make wine, most notably Uhdler and Fragolino. The Isabella being of the genus Vitis x Labruscana imparts a " foxiness " to the wine and because of this is thought to be objectionable, therefore it is not seen as a grape capable of ...

Isabella (grape) - Wikipedia

An Isabella wine label. Isabella is an intriguing American hybrid grape, thought to be a crossing of unknown Vitis labrusca and vinifera species. The exact origins of the variety remain unclear, but it is thought to have occurred naturally when European grapes were first propagated in North America. The name Isabella was given to the variety in 1816 when it was discovered in Dorchester, South Carolina, by Brooklyn nursery owner, William Price.

Isabella Wine Information - Wine-Searcher

In the early 1800s, Isabella was widely planted in the North Atlantic and New England States where Catawba could not reliably ripen, but it fell out of favor after Concord was introduced. Isabella can withstand tropical and sub-tropical climates and is the most widely planted grape cultivar in southern Brazil and is used for both juice and wine.

Buy Isabella Grape Vines For Sale | Double A Vineyards

A dark, purple-skinned vine that originated in the United States, the Isabella grape is widely blamed for the calamitous phylloxera plague that decimated Europe's vineyards. Such notoriety aside, the Isabella grape today is widely planted in Portugal, Japan, Bali and Brazil. While not widely available, the most popular wine made from Isabella is fragolino, a sparkling red said to be sweet and extremely refreshing.
