Referring to the guide number table, determine an appropriate flash output level corresponding to the guide number obtained above, then set the same value on the SB-600. ISO sensitivity factors For sensitivities other than ISO 100, multiply the guide ...

NIKON SB-600 INSTRUCTION MANUAL Pdf Download | ManualsLib

The SB-600 works with every Nikon camera made for the past 40 years. It's the only flash, along with the SB-400 and SB-800, that works properly with the current Nikon digital SLRs like the D50, D40, D80, D200, D2Xs D70, D2H and D2X and their new i-TTL exposure system. Read here about how to use it remotely, which it does for free with the built-in slave.

Nikon Speedlight Compatibility Chart. Nikon has produced many Speedlights over the years, we have compiled a chart to assist with the compatibility between Nikon cameras and Speedlights. Please click on the Speedlight in the table below to see it's compatibility chart.

Nikon Speedlight Compatibility Chart

See a sample guide number chart just below. If the speedlight does not zoom, then that's all it can do, so you can only use and compare that. Flashes that do not zoom (like the camera's internal flash) will have one guide number value. The Nikon D3200 internal flash specification shows it this way:

Understanding Camera Flash Guide Numbers, plus GN Calculator

SB-600 AF Speedlight from Nikon. Registering your Nikon product allows us to send you (with your permission) important updates, service information and helpful hints, and it makes it easier should you ever need to call in for help.

SB-600 AF Speedlight from Nikon

Even different reflectors change guide number. The Nikon guide number charts in the user manuals show these GN specifications. Guide Numbers allow these simplifications to compare exposures (here, for GN / 10 feet, and GN / f4), at full power level, same zoom and same ISO.
