Visualforce Page Guide

Introducing Visualforce. Over the past several years, Salesforce has created a comprehensive platform for building on-demand applications. Like other sophisticated application development platforms, the Lightning platform offers separate tools for defining: The structure of the data—that is, the data model. The rules that detail how that data can be manipulated—that is, the business logic.

Visualforce in Practice - Salesforce Developers

Display a Visualforce Page by Overriding Standard Buttons or Links You can override the actions available on an object with a Visualforce page. When the user clicks a button or link that has been overridden, your page displays instead of the standard page. Setting this up is pretty much identical to Salesforce Classic.

Get Started with Visualforce Unit | Salesforce Trailhead

If the page uses a custom controller, this defaults to the Home tab. To use a custom Visualforce tab, set the attribute to the name (not label) of the tab followed by a double-underscore and the word tab. For example, to use the styling of a Visualforce tab with the name Source and a label Sources, use tabStyle= "Source__tab". 10.0: global: title
