Weaning

Weaning could take days, weeks or months. Even after you successfully wean your child from day feedings, you might continue to breast-feed in the morning and before your child's bedtime to keep up that feeling of closeness. Breast-feeding is an intimate experience. You might have mixed emotions about letting go.

Weaning: Tips for breast-feeding mothers - Mayo Clinic

Weaning is the process of gradually introducing an infant human or another mammal to what will be its adult diet while withdrawing the supply of its mother's milk.. The process takes place only in mammals, as only mammals produce milk. The infant is considered to be fully weaned once it is no longer fed any breast milk (or bottled substitute

Baby-Led Weaning: Benefits, Foods, and Safety

Child-led weaning occurs when a child no longer has a need to nurse – nutritionally or emotionally. A baby who self-weans is usually well over a year old, is getting most of his nutrition from solids, is drinking well from a cup, and cuts down on nursing gradually.

Weaning: How does it happen? • KellyMom.com

Weaning is the process of transitioning kittens from mother's milk to solid food. During weaning, kittens gradually progress from dependence on a mother's care to social independence. Ideally,...

Weaning a Kitten from Mother's Milk to Solid Food

Weaning doesn't necessarily signal the end of the intimate bond you and your child created through nursing. It just means you're nourishing and nurturing him in different ways. For example, if you often nursed your child for comfort, you'll have to find other ways to make him feel better. Read a book, sing a song together, or play outside instead.
